# Social Harmony

## Work required to get the marks available

The first question requires a simple statement - a correct statement gains 2 marks but a partially correct statement gains only 1 mark.

The second question gains 6 marks if there are three pieces of evidence to back up a correct answer and when technical terms are used. Other scores are 0, 2 and 4 marks.

The third question gains 8 marks if there are at least three pieces of evidence to back up a correct answer, using technical terms and showing understanding. Analysing causal connections is important. Other scores are 0, 2, 4 or 6 marks.

The fourth question can only gain 4 marks if another point of view is given and technical terms are used. Other scores are 1, 2, 3 or 4 marks.

## Timings based on 30 minutes

Do not spend long on the first question as it only needs a concise accurate and sufficient statement for the marks. 10% of time is recommended, or 3 minutes, including reading and thinking.

To offer enough evidence on the second question, 30% of time is recommended, or 9 minutes, including reading, thinking and planning.

For the highest quality of reasoned argument with evidence for the third question, 40% of time is recommended, or 12 minutes, including reading, thinking and planning.

The fourth question needs 20% of time, or 6 minutes, to produce at least two contrasting viewpoints and to come to a final opinion on what is expressed.

There are only 24 minutes for these questions in the actual GCSE.
